

HSI

Halmstad School of Innovation

Innovation is the foundation for enterprise creation, development and growth.

Innovation, enterprises face significant challenges: to train and develop their employees and organizing innovation work, from the early phases of identifying needs and opportunities, to actually develop innovations in the form of new products, services and / or business models, and then to commercialize and market the new. To develop a capacity for innovation is key for businesses to be competitive in the long term and create growth.

HALMSTAD UNIVERSITY
