

CCNA Security - Skill Exam 2012

Important items from the labs are:

Lab1 Secure Routers – Passwords, SSH, SNMP/Syslog, NTP

Lab2 AAA-Radius - Local authentication, Centralized authentication (server)

Lab3 CBAC Firewalls - Inspection rules, Access-lists

Lab4 Secure Layer 2 Switches - Secure trunk/Access ports, (Port-security, BPDUguard, Storm-control, DTP etc.)

Lab5 Site to Site VPN

The total time for the examination is two hours. 90 minutes configuration in Packet Tracer and 30 minutes for written short questions. Basic network configuration and routing will be pre-configured.

A sheet of common commands will be provided. You are free to bring your own handwritten notes as well.

Note: During the exam it is very important that you frequently save your .pkt file. Programs may crash and data can be lost. If you by mistake lock yourself out from a device - use the Config tab and click "Static" to regain access to the CLI.
