Digital technology advancement change how businesses operate and fundamentally impacts the workforce. The Master of Digital Service Innovation at Halmstad University will help you to enhance your digital acumen, employability and understanding of sustainable business in the digital era. Business leaders, managers, public officials and politicians recognise more than ever that digital service innovation is critical to address business and societal challenges.

Employers seek applicants with digital innovation expertise. That is why our Master of Digital Service Innovation is designed to equip you with knowledge of how to identify and design innovative digital services and contribute to sustainable solutions. The programme prepares you to work with key roles in digital service innovation and to manage business and social transformation brought with it.

The learning approach involves interaction with research practice, industry and public sector to address future challenges through digital service innovation. The approach to digital service innovation draws on practical approaches and academic literature in information systems, service science, and innovation sciences.
