

Welcome to Halmstad University!

This year's ceremony is the first time that all graduands of Halmstad University are invited to a joint celebration. During the day, we hope you will take the opportunity to explore the campus area and visit one of our innovative lab environments, open between 11:00 and 13:00. Why not visit the Trade Center, and see the city from above!

Our lab environments

Rydberg Core Laboratory (RCL) – an interdisciplinary laboratory at Halmstad University. Research conducted at the lab includes natural sciences, associated applied sciences, and mathematics.

Fab Lab – a concept developed by Massachusetts Institute of Technology, MIT. Take the opportunity to see our advanced manufacturing environment with 3D printers and 3D scanning equipment. Part of RCL.

Human Movement Lab – an environment for teaching and research in physical exercise, movement, function and health, with modern equipment for measuring and evaluating movement and function. Part of RCL.

Health Lab – at Health Lab, students, researchers and University collaborators can design, test and simulate working methods – in environments that make it feel real!

Digital Laboratory Centre (DLC) – a creative, high-tech and laboratory environment with focus on learning, culture and creativity.

- Experience the learning environments of the future in Virtual Reality.
- Relax with the help of sound and light in the Cecilia-room.
- Get a memento! Have your picture taken against our green screen and the University background of your choice.
- Watch movies and presentations about DLC.
- Visit the DLC recording studio.

Electronics Centre in Halmstad (ECH) – a strategic effort created by Halmstad University in collaboration with regional businesses to meet the challenge of digitalization. ECH is an innovation arena for regional collaboration. It is also a test facility, with for instance EMC testing, which can lead to faster product development for companies.

Centre for Health Technology Halland (HCH) – a meeting place for businesses, consumers, the municipalities of Halland County, the County Council of Halland, and Halmstad University, and provides a joint platform for promoting development in the area of health technology. Visit us to hear more of what we do in our various innovation projects.
