Dear Students,

Thank you for your feedback. Overall, the course received a satisfaction rating of 66%. I would like to address some of the points you raised.

We will reconsider the workshop structure for next year, and a new instructor will be assigned to lead it.

Some of you expressed concerns about the exam, expecting that all questions would be directly covered in the provided materials. However, as master's students, it is essential to engage with questions that may not be explicitly mentioned in the course materials. You are expected to apply your understanding of the materials to respond correctly to these questions.

This is a one-year master's program, and the diverse backgrounds of our students have led to some repetitive content from introductory courses from the IT forensics bachelor's program. Nonetheless, we introduced new topics this year, including Agenda 2030, its connection to digital forensics, legalization seminar, and workshops on the challenges of digital forensics in law enforcement.

Best regards,
Mohamed
