Dear Students,

Thank you for your feedback on the course. We appreciate the time and effort you took to share your thoughts, and we always strive to improve the course while maintaining its educational quality. I would like to address some of the key concerns raised:

*Course Difficulty & Support Available

The course is designed to be well-balanced, with a structured progression in complexity. The difficulty reported by some students may stem from not attending lectures or not utilizing the support available. We provided recorded lectures so students could revisit the material at any time, ensuring flexibility in learning. Additionally, for the first time this year, we introduced Project Lectures specifically to give students direct interaction with teachers, allowing them to ask questions and receive immediate guidance. However, attendance at these sessions was notably low, and some students who did attend were often unprepared, which made it difficult to fully benefit from these opportunities.

*Lab Computer Issues

While there were initial technical difficulties with the lab computers, these were resolved within a week thanks to the prompt response of the helpdesk team. We understand that any delays can be frustrating, but we acted swiftly to ensure minimal disruption to your learning process.

*Teacher Availability & Support

Contrary to some feedback, the course teachers were always available to assist students. Throughout the recorded lectures, I repeatedly informed students that they were welcome to drop by my office at any time for help. This option remained open throughout the course, yet it appears that some students did not take advantage of this resource.

We take all feedback seriously and will continue to refine the course while ensuring that students have ample support and opportunities to succeed. I encourage all students in the future to fully

engage with the available resources, attend scheduled sessions, and seek help when needed.
