Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Good and interesting labs matching the course contents, good execution of the course, including timely exam correction.

Based on the course evaluation result - which are the weaknesses of the course?

Nothing serious really, but two comments stood out in the course evaluations. One was early lectures (practically all were scheduled at 8:15), the other one was a suggestion to have more current technology and software oriented lab assignments.

Comments about the collaboration with the course ambassadors

The course went smooth and the interactions with the course ambassadors were minimal.

Conclusion and suggestions for course development or already made decisions

In the next course more guidance on the possible software and frameworks for doing the lab assignments will be provided. This is going to be, however, a free choice.

Other comments

As usual, I would like to thank all the students that actively participated in the course, and especially those that answered the course evaluation!

Wojciech
