Dear Students

Thank you all for your valuable feedback! The overall satisfaction index is 64%. I appreciate your insights and will consider them for future course iterations.

Making the course more interactive would help engagement. We shifted to on-campus sessions based on student requests mid-course, which allowed for more direct interaction. In the future, I'll look for additional opportunities to make the lectures more engaging, including using tools like Polleverywhere.com/ and incorporating more questions during class to improve participation. I see the industrial communication topics (e.g., Profibus, Profinet, LIN) as relevant to the course direction. However, we should consider linking these to broader themes like IoT, security, and antennas in future course updates.

Regarding format, some of you found the fully online setup challenging, especially for a subject like networks. I'm glad the on-campus shift worked better for many of you, and I'll continue to incorporate more hybrid or in-person sessions when possible.

Kind regards,

Mohamed
