

MX6011 (Innovation for Sustainable Business Development, HT 2024, Halmstad, E0525, H0525, X0525)

Number of possible respondents: 18

Answers: 8

Response rate: 44,44 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

- Student preparing presentations and topics for discussion in English was considered challenging but rewarding for learning
- Good study environment with much interactions and exchanges of perspectives
- Good feedback on student assignments
- Workshops intended for preparing presentations and discussion topics

Based on the course evaluation result - which are the weaknesses of the course?

- Course literature sometimes lacks depth and misses out on certain aspects related to CSR.
- Difficult and time consuming individual follow ups to the presentations
- The assigned number of credits for the different examination tasks did not match the work load required to complete them

Workshops could have included more pre-planned activities to enhance learning

Comments about the collaboration with the course ambassadors

Two course ambassadors were appointed. Communication has worked well. The teachers asked for feedback after 50 % of the course had passed, and received very good points on what worked well and on what could be improved.

The course ambassadors were also invited to add specific questions to be included in evaluation survey.

Conclusion and suggestions for course development or already made decisions

- Find new course literature
- Try to make parts of the workshops more interactive by including various activities
- Revise the allocation of credits to the different examination tasks to better fit the work and time needed to complete them
- Improve/redesign the individual follow up/discussion tasks on Blackboard to provide a better learning experience
