Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The seminars and the project were well received.

Based on the course evaluation result - which are the weaknesses of the course?

The students this year (as well as previous years) comment on wanting to have more lectures. The problem is that many students do not attend the lectures, since lectures are not mandatory. So to invest a lot of the course budget into lectures is a waste of resources.

Communication on how grading was done was lacking in one/some cases. Communication however is hard if the students do not come to the lectures.

Students also would like to go on an excursion during the course. However, the time of the year is not really good for field excursions. We have therefore put all the program-relevant excursions into the first two courses.

Comments about the collaboration with the course ambassadors

We recruited course ambassadors, but then never had time for a formal meeting with them.

Conclusion and suggestions for course development or already made decisions

We could include a written examination at the end of the course instead of having mandatory seminars. This would probably reduce the number of students that pass the course, but we could put more work into lectures, since we can examine the content of the lectures in a written examination.
