Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Practical assignments (labs and project) closely related to the lecture topics.

Based on the course evaluation result - which are the weaknesses of the course?

This year exceptionally, because the exam was given for the first time, there was no sample exam provided, this was mentioned more than one time in the evaluation.

Comments about the collaboration with the course ambassadors

There was only one course ambassador, working with whom was very good.

Conclusion and suggestions for course development or already made decisions

Next year some sample questions for the exam should be available.

Other comments

I would like to thank all the students that provided feedback for their valuable comments, and every single student for active participating in the course (the percentage of the "committed" students this year was exceptionally high).
