Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Based on the course evaluation, I am pleased to see that students appreciated the overall structure of the course, especially the hands-on lab work and the lecture delivery. The satisfaction index reached 74%, and several students commented positively on the engaging lectures and the practical learning opportunities provided through the lab exercises.

Based on the course evaluation result - which are the weaknesses of the course?

At the same time, the feedback highlights several areas for improvement. These include the need for:

- Better synchronization between lectures and lab assignments,
- Improved clarity and functionality of lab instructions, especially on school computers,
- Access to additional learning materials, such as old exams and practice exercises,
- More structured lecture timing and classroom management, such as clear break times and minimizing interruptions during class.

Comments about the collaboration with the course ambassadors

-

Conclusion and suggestions for course development or already made decisions

In response, I will review and revise the lab materials to ensure they align more closely with the lectures and function reliably in the school environment. I will also provide additional support materials via Blackboard earlier in the course and ensure better pacing and structure during lecture sessions to support student focus and engagement.

I appreciate the constructive input and will use it to strengthen the course content and delivery in future iterations.
