Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Based on the course evaluation results, the strengths of the course include well-structured assignments, the practical application of theoretical knowledge, and an engaging and passionate teaching style. Students particularly appreciated the opportunity to work with real database management systems and to deepen their understanding of database design. The teacher's dedication and ability to inspire were also highly praised, playing a significant role in creating a positive and motivating learning environment.

Based on the course evaluation result - which are the weaknesses of the course?

Based on the course evaluation results, students required more support during database design.

Comments about the collaboration with the course ambassadors

The examiner chose not to implement the course ambassador model. Instead, student feedback was actively encouraged through open discussions during lectures, lab sessions, and group supervisions, providing multiple opportunities for students to voice their opinions and suggest improvements. Adjustments to teaching and learning activities were made during the course in consultation with students, reflecting a responsive and participatory approach to course development.

Conclusion and suggestions for course development or already made decisions

The current course structure, which includes group work and seminars, contributed to positive course dynamics and helped students achieve the intended learning outcomes.
