Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Thank you for taking the time to fill in the central evaluation survey sent by the University and for the constructive comments you provided—approximately 32 % of the class filled in the survey.

Overall, those who answered the survey have taken useful tools from the course and have enjoyed different parts of the course and the overall experience-based learning approach, especially the high amount of practical work and the simulation.

Based on the course evaluation result - which are the weaknesses of the course?

However, some of you emphasize that a clearer structure on BB was needed, as well as to make sure that all information posted on BB is up to date and correct. Some of you also commented on the examination and have suggestions to remove one of the examination parts. Some suggestions on having only individual assignments were also made. Finally, clearer feedback on the assignments was also requested.

Comments about the collaboration with the course ambassadors

This is a single-subject online course, and participants come from very different areas and do not know each other. That's why the course ambassador model is hard to implement. Instead of course ambassadors, a continuous dialogue with students was carried out throughout the course.

Conclusion and suggestions for course development or already made decisions

We are quite happy that you have identified several aspects where you see the potential for improvement that we will consider for next year's course, such as removing inconsistencies and making sure the instructions and requirements for different activities are aligned. Another aspect is to look over the examination parts and the workload.

Other comments

Good luck with your future studies and work!

I am overall satisfied with the course.

	Number of responses	Distribution (%)	Index (%) I am overall satisfied with the course	46
0 = I definitely do not agree	0	0%		
1	3	30%		
2	2	20%		
3	4	40%		
4	1	10%
