

IK4062 (Introduction to Front-End Programming, VT 2025, Halmstad, V3111, X3111)

Number of possible respondents: 40

Answers: 16

Response rate: 40,00 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Based on the course evaluation results for IK4062, the main strengths of the course include the students' opportunity to demonstrate their achievement of learning outcomes during examinations and a generally positive social study environment, which received index scores of 53 and 57, respectively. However, the overall satisfaction index was low, and the course design received particularly poor feedback. Therefore, improvements are needed in teaching methods, references, and assignments to better align with the learning outcomes and the capabilities of the students.

Based on the course evaluation result - which are the weaknesses of the course?

The course evaluation highlights several notable weaknesses. The most significant concern is the poor alignment between the course design, encompassing teaching methods, literature, and pedagogy, and the intended learning outcomes, reflected in a low index score. Additionally, overall student satisfaction was low. These figures indicate that the course structure and delivery did not effectively support students' learning needs. However, we should note that only 16 (of 40) students answered the survey, which is not an accurate result.

Conclusion and suggestions for course development or already made decisions

In conclusion, the evaluation results for IK4062 indicate a clear need for course development, particularly in pedagogical design and alignment with learning outcomes. The low satisfaction scores suggest that students should engage with the course content in a meaningful way. To address these issues, proposals for course improvement should focus on redesigning the teaching methods (e.g., assignments) and references to better support active learning and clearer progression toward the stated outcomes. Additionally, increasing opportunities for feedback, clarifying expectations, and ensuring coherence between course components may enhance overall satisfaction.
