Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course has a high student satisfaction rate of 93%, with 67% of students saying they are very satisfied. The course design supports learning goals well, earning an 89% satisfaction score, and students feel that exams are fair, which also received an 89% score. The social learning environment is very supportive and engaging. Hence, the course content that connects theory to real-world applications, the projects, the lectures, and the high quality of teaching, all of which were satisfactory.

Based on the course evaluation result - which are the weaknesses of the course?

Students expressed a desire for more in-depth lectures and technical exploration, along with real-world case studies and examples from the industry. Some felt that understanding certain technical concepts was left too much to individual effort, suggesting a need for more guided instruction. Additionally, feedback indicated that the course could feel imbalanced, which could be improved.

Comments about the collaboration with the course ambassadors

-

Conclusion and suggestions for course development or already made decisions

The course has received positive feedback from students and has met its goals. It has strong qualities in both its design and learning environment. To improve, it's suggested to add more lectures on practical applications, incorporate real-world case studies, enhance technical content, balance the lecture structure for better engagement, and consider open communication to address student needs.
