Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Thank you for taking the time to fill in the central evaluation survey sent from the University and for the constructive comments you provided—approximately 33% of the class filled in the survey. Overall, those who answered the survey took useful tools from the course and enjoyed different workshops and the experience-based learning approach, as well as the possibility to write the final report throughout the term with multiple assignments. You have also appreciated the collaboration with a company.

Based on the course evaluation result - which are the weaknesses of the course?

However, some of you would like to see more focus on innovation rather than on business models only. More feedback was also wished for. Combining industrial management course and energy smart course was not perceived as beneficial. A possibility for bonus points for students who attend the classes was wished for as well as less involved teachers in the course. While some enjoyed the case company, others emphasized the need for a better link between the company wishes and the requirements of the assignment.

Comments about the collaboration with the course ambassadors

We have not implemented the course ambassador model.

Conclusion and suggestions for course development or already made decisions

We are happy that you have identified several aspects where you see the potential for improvement that we will consider for next year's course, such as streamlining the course content. We will also look over the organization of the course project work, and the requirements around it.

Other comments

Good luck with your studies!

I am overall satisfied with the course.
