Antal möjliga respondenter: 30

Antal svar: 11

Svarsfrekvens: 36,67 %

Studietakt: 50 %

Examinators kursanalys

Vilka styrkor har kursen?

Engaged, varied teaching. Interesting, relevant subject. Plenty of extra materials available for helping with the learning process. "Study environment" got the highest value.

Vilka svagheter har kursen?

Lectures are too long, too jumbled. Making them shorter and more focused would be better. Poor information for presentations and lab reports. Biochemistry is difficult. "Course structure" received the lowest value.

Kommentera samarbetet med kursambassadörerna

Meeting with the course ambassadors occurs during the beginning of LP4 (after the end of the course) in accordance with an agreed schedule for such meetings.

Slutsatser samt eventuella förslag till kursutveckling eller beslut som redan fattats

The course structure can be reexamined, particularly with a focus on the lectures and how they are set up; but since the class seemed very divided on the matter it is hard to know exactly how to improve it. After having already removed a lot of material, it would be unreasonable to remove more, but perhaps restructure the content into more, smaller lectures. Make better use of the "exercise classes" after - attendance to these was very poor.

Övriga kommentarer

Thanks to the students who responded, I always appreciate honest and polite feedback, and this is what I got. The scores were disappointingly low, but not unreasonable. There was a wide spread of very high and very low scores on the different survey questions which is unsurprising. Participation in the survey was fairly low (36%) and therefore makes it hard to draw concrete conclusions. However it reflects the lower limits of student engagement in non-obligatory learning moments, so there is possibly a lot of value in the comments received. They will be carried forward as much as possible.

Jag är sammantaget nöjd med kursen.
