Comments about the collaboration with the course ambassadors

The course ambassadors have been an invaluable asset to both the course and the teaching team. Throughout the term, we held three dedicated meetings—at the beginning of the course, mid-way through, and following the final seminar.

The feedback provided during these meetings has played a pivotal role in shaping the course. Several suggestions were implemented immediately, leading to real-time improvements in the course delivery. In addition, the ambassadors' insights have contributed significantly to the development of planned revisions for the upcoming course syllabus.

We sincerely appreciate the ambassadors' engagement and constructive input, which have helped ensure the course remains responsive and continuously evolving.

Conclusion and suggestions for course development or already made decisions

Thank you sincerely for your valuable feedback on the course evaluation. Based on your input, we will be implementing significant adjustments to enhance the course structure and learning experience.

Moving forward, the course will be aligned more closely with the innovation management process to provide a structured and comprehensive understanding of the subject matter. Additionally, we plan to integrate a more hands-on, practical component by adopting a hackathon-style format. This will involve collaboration with a partnering company or the engagement with a real-world problem, allowing students to apply theoretical knowledge in a dynamic and solution-oriented environment.

The course syllabus will be revised accordingly to reflect these developments and will be implemented in the next iteration of the course. We are confident that these changes will enrich the learning outcomes and better prepare students for practical challenges in the field of innovation management.

Thank you once again for your contribution to the continuous improvement of the course.
