Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course is structured as lectures, reflection assignment on the lectures, short tests, exercises, and a large project. Most students seem to be satisfied with the lectures and the reflection assignment.

Based on the course evaluation result - which are the weaknesses of the course?

However there has been requests for more exercises accompanying the lectures. This will be implemented in the course.

>There has also been comments that the project assignment is too complicated, or too time consuming. After discussions during the verbal course evaluation, it is apparent that the project may need to be simplified to a certain extent.

Comments about the collaboration with the course ambassadors

Course ambassadors could not be recruited, but in addition to the formal course evaluation a verbal course evaluation was held in class. The two did not entirely correspond to each other, maybe because of the lack of anonymity during the verbal course evaluation.

Conclusion and suggestions for course development or already made decisions

A new project will be created for the next course, where the different financial concepts included in the previous project description is more isolated from each other, and thus a bit more simplified.
