Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Course analysis: Aquatic Ecosystems BI4033, Autumn 2022

In total, 17 out of 34 students answered the course evaluation (50%). The students were overall satisfied with the course (76%) and the course satisfaction index was 78%. They were also happy with the design of the course (79%) and thought that they had the opportunity to show that they achieved the learning outcomes in the syllabus during the course examinations (75%). The students also experienced the social study environment as good (82%). The time the students spent on the course corresponded in general to the course study pace.

From the feedback we have received from the students during the course, they seem to have enjoyed the excursions the most. They would however have liked more time for some of the modules (Bolmen excursion and river project) to be able to get a deeper understanding.

Based on the course evaluation result - which are the weaknesses of the course?

The students seem satisfied with the commitment from the teachers but would have liked more information about the examinations (presentations, report and final exam) earlier during the course. It is therefore important to improve the communication and information to the student next year.

Comments about the collaboration with the course ambassadors

-

Conclusion and suggestions for course development or already made decisions

The teachers are very happy that the course turned out so well, since it is the first time it was given by this group of teachers and since it included several new modules.
