

DI2012 (Computer Networks, HT 2022, Halmstad, H3222, X3107)

Number of possible respondents: 44

Answers: 15

Response rate: 34,09 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The overall Course satisfaction index is good (71%) and the laborations and other practical exercises were very appreciated.

Based on the course evaluation result - which are the weaknesses of the course?

Too much information in each lecture and difficulties to understand everything, the time is not enough to cover everything that are mentioned on the lecture slides

Comments about the collaboration with the course ambassadors

There were no students interested in becoming course ambassadors, but the course responsible teacher got input from many students during the course.

Conclusion and suggestions for course development or already made decisions

Improve the content of the lectures to only cover the most important topics or give additional examples to the theory. Also make sure that the lab assistants test and prepare all laborations well before each session, so they will be able to answer to questions during the lab sessions.

Other comments

The response rate was only 34% so the result and comments in the evaluation does not reflect all students opinions.
