Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Course contents, course structure, lab tasks, invited lectures. Generally the students were very positive about everything in the course.

Based on the course evaluation result - which are the weaknesses of the course?

1. More exam question guidance, provide sample answers.
2. Better description of the lab work organisation.
3. Jersey API / REST API guidance.
4. Early lectures.

Comments about the collaboration with the course ambassadors

The course did not have course ambassadors (no one volunteered and it is my approach not to force it on unwilling students).

Conclusion and suggestions for course development or already made decisions

Re. 1. It was clear to me from the exam results that students in fact concentrated too much on the sample exam questions instead of the course material. Thus I shall underline what should be studied before the exam, in my opinion providing sample answers may actually be detrimental to exam results.

Re. 2. will be rectified during the introduction lecture and better descriptions on Blackboard.

Re. 3. This part of the course serves as the self-study part, so I may provide more pointers to self-study, but there will be additional lectures on this.

Re. 4. Nothing that can be done about this, the contributing factor to this are students' internships that are scheduled in the same LP.

Other comments

I would like to thank all the students that participated in the evaluation and I was very happy to see so many positive remarks. Wojciech
