## Examiner's course analysis

### Based on the course evaluation result - which are the strengths of the course?

The theoretical part of the course is the most significant part, and it is well appreciated by the students

### Based on the course evaluation result - which are the weaknesses of the course?

The practical session is the one that causes many complaints.

### Comments about the collaboration with the course ambassadors

-

### Conclusion and suggestions for course development or already made decisions

The lab assignments should be revised based on the feedback in the course evaluation report.

### Other comments

I observed that this year we had students with poor programming skills. One of the main reasons why students complain a lot about lab assignments is the lack of programming. This course is not designed to teach students how to code Python.
