

MT6008 (Internship / Industrial Placement in Applied Mechanical Engineering, HT 2022, Halmstad, X0505)

Number of possible respondents: 5

Answers: 4

Response rate: 80,00 %

Study pace: 100 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Students seem to enjoy their internship and the work with a project. They also met many new people and trained their English.

Based on the course evaluation result - which are the weaknesses of the course?

Some want more feedback on writhing, and sometimes follow-up meetings more regularly.

Comments about the collaboration with the course ambassadors

No ambassadors were chosen, instead all 5 students were included when discussing their internship, at least every other week when met at work. Students enjoy working independently with their projects, mixing practical work with theoretical parts. Hard with writing, but oral English improved a lot.

Conclusion and suggestions for course development or already made decisions

The internship is the same, but different, every time depending on project and the amount of students. What is important is the follow-up and making sure that all feel comfortable with the project & supervisors.

Other comments

The students are really happy about their time here at HH, both labs (especially the warm welcome in FalLab) and elsewhere - "everybody are so nice and open!"
