Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Overall, we got a positive response to the course structure as many of you found it rewarding to prepare, present and discuss each topic in the course literature thoroughly. Additionally, many of you considered the guest lectures very rewarding which indicates that we should continue to include them in the upcoming course.

Based on the course evaluation result - which are the weaknesses of the course?

Assignment associated to the discussion forum was too comprehensive and time consuming.

Clearer goals for how to reach the different grades for both presentation and the discussion forum. For example, how many sources and what kind of sources you are supposed to use (e.g., only scientific articles vs. info from authorities).

Some students expressed that the exam was too difficult and that they were unfamiliar with this type of multiple-choice questions.

Comments about the collaboration with the course ambassadors

No course ambassadors were recruited

Conclusion and suggestions for course development or already made decisions

Adapt the discussion forum assignment according to the comments, primarily reducing the number of questions for each topic.

Provide clearer grade criteria for the discussion forum assignment and student presentation assignment

Provide more example questions for the exam on Blackboard to facilitate the understanding on how the exam will be structured.
