Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course was generally well received by the students that showed up.
Good mix of theory and practice. Students liked the practical group project and the supervision received.

This is a well planned out and developed course with good and relevant lectures.
Seminars and mini-exams were appreciated.

Based on the course evaluation result - which are the weaknesses of the course?

A better course book would be nice, but I have not been able to find a better one.
There were some issues with scheduling, which were out of my control. They led to some confusion. I hope we will have better luck next year.
One of the guest lecturers had too much content in his lecture. We will break that up into two lectures next year.

Comments about the collaboration with the course ambassadors

It worked well. I got a lot of feedback during and after the course from students.

Conclusion and suggestions for course development or already made decisions

I will make the course introduction mandatory next year, so that students will understand the rules.
Students also need to understand that this is a course that requires work and presence on campus.

**Should the workload have been distributed differently over the duration of the course?
If yes, when did you have too much and when too little to do?**
