

TB4011 (Exercise Physiology with Laboratory Methods, HT 2022, Halmstad, 10312, H0311, X0311)

Number of possible respondents: 18

Answers: 11

Response rate: 61,11 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The strengths of the course are the integration of exercise physiology theory with practical labs, and that at the end of the course the students brought all the knowledge together in a course done in conjunction with ELEIKO.

Based on the course evaluation result - which are the weaknesses of the course?

That the teacher had not prepared properly for his own skills before teaching the labs and was not able to estimate the proper amount of material possible to cover during a lecture. Also, a question on the exam was graded incorrectly which naturally upset the students.

Comments about the collaboration with the course ambassadors

2 course ambassadors were appointed and communicated with program and course directors. In turn they involved the course examiner to correct mistakes e.g., the incorrect grading. We also rescheduled some exams after the course ambassadors indicated that students felt too much stress towards the end of the year.

Conclusion and suggestions for course development or already made decisions

The ill prepared teacher will not be involved in the course in the future and based on student communication about course load, we will cooperate with the parallel course and make sure not too many examinations are scheduled during the same week.
