

DT4020 (Data Security for Embedded Systems, VT 2023, Halmstad, V3999)

Number of possible respondents: 55

Answers: 20

Response rate: 36,36 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The students have found the course interesting and rich with relevant examples.

Based on the course evaluation result - which are the weaknesses of the course?

The course material is considered heavy (this is, as also noted in the evaluation, inherent to the topic) and needs a bit of restructuring to remedy this, it is, however, not very clear on how to do it (this is also admitted in the comments).

Comments about the collaboration with the course ambassadors

The work with the course ambassadors was perfect, I received very useful feedback (which is also in line with the course evaluation), the only thing I can do is say big thanks to the students involved.

Conclusion and suggestions for course development or already made decisions

The work on lightening and restructuring the course will continue.

Other comments

I would like to thank for all the warm words I received in the evaluation! Also, one comment provided a very good idea for a new lab task that I will definitely use in the future, thanks!

Thank you,
Wojciech
