Antal möjliga respondenter: 10

Antal svar: 4

Svarsfrekvens: 40,00 %

Studietakt: 50 %

Examinators kursanalys

Vilka styrkor har kursen?

From the feedback, it seems the course is appreciated for having multiple more minor examinations spread throughout the course. The CSWA certification seems appreciated. The mix of online and in-person teaching is highlighted as a strength.

Vilka svagheter har kursen?

It seems there was a conflict between the sessions for this course and the parallel programming course. All events for this course were organised via the official Schema, so this must be investigated to avoid issues. This conflict was highlighted as a reason for low attendance in the course tutorials where the vital practical skill of CAD is taught. Blackboard recordings seem to not be available off campus? This will be investigated.

Kommentera samarbetet med kursambassadörerna

As the group was small, it was more efficient to ask for input from all individuals instead of a single student. There was good dialogue during the lectures, but the issue of conflicting sessions in the two courses in Study Period 3 was not highlighted.

Slutsatser samt eventuella förslag till kursutveckling eller beslut som redan fattats

The course content appears to be well placed, and the focus will be on ensuring there is no time conflict that occurs outside of Schema and that access to recorded sessions is maximised. There was a comment that 50-minute sessions are perhaps too long. I will try to plan some of the teachings to occur in 25-minute sections next year.

Övriga kommentarer

There seems to be a struggle to do well in the CSWA exam. This exam requires considerable hands-on experience of using CAD, and I may consider some additional videos and teaching materials that students can use in their own time for further practice.

Kursens nöjdhetsindex

This year the online attendance for the Solidworks tutorials has been poor. In previous years attendance for these sessions has been near 100%. Please give reasons as to why you think attendance was lower this year for the online Solidworks tutorials. Please suggest changes that you think would improve attendance. Please note that all answers are anonymous.

Are there things you wished to cover in Solidworks that you think are currently missing from the course?

Do you think the tutorials, lectures and assignments have given you enough practice to be competent enough to pass the CSWA exam?

Do you think the tutorials, lectures and assignments have given you enough practice to be competent enough to pass the CSWA exam?	Antal svar	Fördelning (%)
Ja	3	75%
Nej	1	25%
