Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Thank you for taking the time to fill in the central evaluation survey sent from the University and for the constructive comments you provided—approximately 19 % of the class filled in the survey. Overall, those who answered the survey have taken useful tools from the course and have enjoyed different parts of the course and the different digital tools, including the simulation.

Based on the course evaluation result - which are the weaknesses of the course?

However, some of you would like to see better coordination between the instructions and requirements given by different teachers, as well as the few activities that were carried out online to be done on campus. You also comment on the workload and the number of submissions.

Comments about the collaboration with the course ambassadors

This is a single-subject course, and participants are coming from very different areas and do not know each other. That's why the course ambassador model is hard to implement. Instead of course ambassadors, a continuous dialogue with students was carried out, concluding with a bigger internal to the course evaluation. The additional comment that surfaced there was the group size with a wish to have a smaller group size.

Conclusion and suggestions for course development or already made decisions

We are quite happy that you have identified several aspects where you see the potential for improvement that we will consider for next year's course is - longer time for the project seminar, all activities on campus, including the simulation, reconsidering the assignments and making sure the instructions and requirements for different activities are aligned. Another aspect that you put forward is the need for better communication and coordination between teachers.

Other comments

Good luck with your future studies and work!
