Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

It is valuable for our development work. Overall, the practical sessions turned out to be the best part of the course elements. Lectures followed by practical sessions with elements of a couple of seminars seems to be appreciated. We continue with that plan.

Based on the course evaluation result - which are the weaknesses of the course?

Most clear concerning instructions, the course book and a skewed distribution of credits

Comments about the collaboration with the course ambassadors

Thank you for filling in the evaluation. Equally important is the ongoing feedback we have received from you in connection with lectures, seminars and practical sessions.

Conclusion and suggestions for course development or already made decisions

Based on the feedback, we will review the arrangement of the mandatory elements. We will redistribute the credits and put a smaller amount on the written exam and add credits to the practical skills. We will also clarify the instructions concerning the practical sessions and the practical examination and add opportunities to make practical completions. The course book will be replaced for next years course.

We will also more clearly communicate the safety routines and add information that it is possible to participate without practicing in some situations during the practical sessions.
