Number of possible respondents: 20

Answers: 12

Response rate: 60,00 %

Study pace: 100 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course evaluation results highlight several strengths. Students particularly appreciated the clear structure and organisation of the course. Many students emphasised the value of working with experienced and supportive educators and supervisors, noting that the continuous guidance significantly improved their academic writing and critical thinking. The freedom to choose topics and plan one's time was also highlighted as motivating and supportive of independent learning. The course evaluation also highlights areas for improvement. Some students expressed a need for additional support in study techniques, as the high level of freedom could make it challenging to stay focused early in the course. Some students suggested that previously non-mandatory teaching activities should be mandatory, noting concerns about poor attendance.

Based on the course evaluation result - which are the weaknesses of the course?

The course evaluation also highlights areas for improvement. Some students expressed a need for additional support in study techniques, as the high level of freedom could make it challenging to stay focused early in the course. Some students suggested that previously non-mandatory teaching activities should be mandatory, noting concerns about poor attendance.

Comments about the collaboration with the course ambassadors

Meetings have been held with course ambassadors, where the course evaluation results were analysed and discussed, including suggestions for future course development.

Conclusion and suggestions for course development or already made decisions

Planned improvements include clearer communication and routines regarding mandatory attendance. The course will also consider introducing additional support for study strategies early in the course to help students manage the freedom and workload more effectively. Regarding the link to sustainable societal development, the course needs to clarify this theme better. Questions regarding the use of generative AI will also be discussed with the teaching team before the course is offered again.
