Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Thank you for taking the time to complete the evaluation survey and for your constructive comments. More than half of the class (55%) filled out the survey, a significant improvement in response rate compared with last year. Overall, you liked the course and the focus on the project, which helped you to understand the various methods and tools, as well as the varied work and lectures. You liked the AI workshop, FabLab visit, the sustainability lecture, and the communication between students and between students and teachers. Overall, you experienced a good atmosphere in the class and the group project. Allowing time for scheduled group project work

Based on the course evaluation result - which are the weaknesses of the course?

Your main point for improvement is that we see over the length of the lectures - 4 hours was perceived as too long. You also commented on the number of examinations, suggesting we cancel the blogs or reduce the exam. Some of you also felt that the material on Blackboard was too much and asked for more personalized guidance on how to navigate the material, as well as more examples from last year, to provide a concrete way to illustrate what is expected for the course project assignment.

Comments about the collaboration with the course ambassadors

The collaboration with the course ambassadors worked smoothly, and an ongoing dialogue was established in real time with all students during the scheduled lectures as well as through Blackboard. The results from course evaluations were communicated to the student ambassador. Based on them and on the overall impressions from the course, the following points were brought up:

- Overall, the course was fun with useful workshops, lectures and course content. Accessible and friendly teaching team. The content was well explained in details and serviced as a good bases for the final written exam.
- It would be good to see over the length of the lectures. Even if time was given for work on the project, four hours were too long. Potentially, give a longer deadline for the final project submission, so students have time to "digest" the course material.

Conclusion and suggestions for course development or already made decisions

Overall, you are satisfied with the course. Aspects that you recommend improvement, which I will take into consideration for next year's course, are – considering different ways to offer personalized guidance of the material, and reviewing the duration of the lectures. I will also consider the different examination components of the course.

Other comments

Good luck with your future studies!

I am overall satisfied with the course.

	Number of responses	Distribution (%)	Index (%) I am overall satisfied with the course	76
