Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Designer-in-residence week remains a highlight for students. The introduction of prototyping work at FabLab was appreciated as well

Based on the course evaluation result - which are the weaknesses of the course?

Group composition remains a largely unsolvable problem, regardless of the modality (random, teacher-made, student-chosen groups), since it depends by and large on student-to-student relationships and maturity level.

Observations were added to the evaluation concerning goals, vagueness, and clarity and the need for more hand-ins.

Comments about the collaboration with the course ambassadors

-

Conclusion and suggestions for course development or already made decisions

As for all previous EXP courses, conversations are already ongoing to streamline both structure and content of the course.

Other comments

It's necessary to point out that some of the comments offered in the evaluation ("a lot of instructions are unclear and not given") seem to depend on lack of engagement on the side of the student cohort rather than from shortcoming of the course. Instructions were provided on BB, via a class DM channel, and verbally in class in a timely and exhaustive manner, often more than once.

Similarly, the request for more hand-ins clashes with the relevant number of students who do not respect deadlines for course assignments, and that dealing with the ambiguous nature of briefs is part of what all courses, this one included, have among their ILOs. Students receive constant support via supervision and open discussion for addressing these issues.

I am overall satisfied with the course.

	Number of responses	Distribution (%)	Index (%) I am overall satisfied with the course	62
0 = I definitely do not agree	1	12%		
1	0	0%		
2	2	25%
