Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The overarching structure, assignments rather than written exams, practical orientation, overview of theories to structure thinking rather than 'one framework fits all'. This comments are in line with the basic design and vision of the course.

Based on the course evaluation result - which are the weaknesses of the course?

Could improve some aspects: e.g more group work and group discussions, more prerecorded lectures, update some AI links, systematically provide handouts and not just recordings. These are adhoc comments and may not reflect all students' views.

Comments about the collaboration with the course ambassadors

Ran informal setup given the students are fulltime workers. This meant asking for comments during all the sessions.

Conclusion and suggestions for course development or already made decisions

Will update some recordings, clarify instructions, and make some adjustments in terms of the schedule, much in line with in-class feedback.
