Dear All.

Thanks a lot for taking the time to give your feedback about the course. Also, I appreciate the compliments and kind words.

Overall, the course is higher than last year, with a course satisfaction index of 68%

The main points that I want to highlight are:

Similarity with Previous Course: Despite our efforts, the similarity issue with a previous course persists, as noted by both course ambassadors and feedback in this evaluation report. I've brought this concern to management's attention, and we are actively working towards a resolution.

Seminars with Research Papers: Seminars play a crucial role in promoting active student participation. However, I acknowledge the feedback regarding the preference for more practical articles over theoretical ones during these sessions. We will explore options to incorporate more practical content to enhance engagement.

Lab Zero: The importance of Lab Zero cannot be overstated. While I'm hesitant to make it mandatory, given its significance, I'm open to considering this suggestion. Despite reminders, the submission rate for Lab Zero remains lower than anticipated.

Judicial System: While the course primarily focuses on digital forensics, I understand the value of addressing legal aspects. Given the global nature of digital forensics, the textbook's coverage of fundamental American regulations is respectable. For those interested in Swedish law-related topics, I anticipate such content may be included in your curriculum in the future.

Teaching this course has been a rewarding experience, and I wish you the best moving forward.

Kind regards,
Mohamed
