Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Lectures with real examples, labs that students clearly enjoyed.

Based on the course evaluation result - which are the weaknesses of the course?

Judging from the comments, the exam needs a bit of restructuring, it is also clear from the grading of the labs and the exam that the concept of MC/DC needs to be explained better / have more time spent on. There was also a comment to have a project instead of labs, this is something that the teacher considered for some time now, this is difficult to implement due to hardware use requirement.

Comments about the collaboration with the course ambassadors

Interactions were good, but also very minimal (there was no real need for any "interventions" during the course).

Conclusion and suggestions for course development or already made decisions

Consider the weakness remarks made above.

Other comments

I would like to thank all the students for active participation in the course (the interactions during the lectures were more than usual), and the smaller group that filled in the course evaluation.

Best regards,
Wojciech
