Conclusion and suggestions for course development or already made decisions

We thank the student who took the time to complete the course evaluation for "System-on-Chip Design (DT8023, Spring 2024)." Although we only received one response, we consider all feedback invaluable for the continual improvement of our courses. We acknowledge that statistics from a single participant do not offer a reliable evaluation. We encourage more students to participate in future evaluations to help us gain a better understanding of effectiveness and student needs.

Our Action Plans for Course Improvement:

- Action: Implement a structured timeline for providing feedback on lab assignments to ensure students receive it before subsequent labs are due. This could involve setting internal deadlines for instructors and teaching assistants to review and return graded assignments.

- Action: Provide clear, detailed guidelines for lab reports at the beginning of the course. These guidelines should outline the expected structure, level of formality, and content. Additionally, consider hosting a workshop or providing examples of successful reports to clarify expectations.
