

IE2014 (Development of New Goods and Services, VT 2024, Halmstad, 20116)

Number of possible respondents: 11

Answers: 4

Response rate: 36,36 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Thank you for taking the time to fill out the evaluation survey and for the constructive comments you provided. Very few, around 36%, of the class filled in the survey. Overall, you liked the course and the focus on the project, which helped you to understand the various methods and tools, as well as the varied work and lectures. You also lift the blogs as a good format to identify and understand different challenges (wicked problems) and to see what kind of possible solutions are out there.

Based on the course evaluation result - which are the weaknesses of the course?

Your main point as an opportunity for improvement is the high emphasis on the course project, which does not leave time for preparation for the oral exam. As well as the multiple examination forms, which were too time-consuming. At the same time, none of the respondents in the course evaluation stated that they had put more time into the course than what the study pace required, which indicates that the course workload corresponds to the study pace.

Comments about the collaboration with the course ambassadors

It took a long time to recruit course ambassadors. After that the collaboration with the course ambassadors worked smoothly, and a good constructive dialogue was established in real time during the scheduled lectures. The results from course evaluations were communicated to the student ambassadors. Based on them and on the overall impressions from the course the following points were brought up:

- visit to FabLab good, but having a teacher from the course present would have been beneficial to establish the connection to the course.
- The blogs were really interesting and giving. However, difficult to distinguish between the three ones (what the focus shall be). So, differentiated instructions for each blog would be beneficial.

Conclusion and suggestions for course development or already made decisions

Overall, you are satisfied with the course. Aspects that you recommend improvement, which I will take into consideration for next year's course, are –seeing over the blogs and considering how preparation for the written exam can be encouraged early on.

Other comments

Good luck with your future studies!
