Number of possible respondents: 40

Answers: 18

Response rate: 45,00 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The topic is very relevant as we need to focus more on sustainability and not waste our resources.

Based on the course evaluation result - which are the weaknesses of the course?

There is too little material for lectures and that there is no laboratory component.

Comments about the collaboration with the course ambassadors

No course administrators could be appointed.

Conclusion and suggestions for course development or already made decisions

The lecture material will be redone and provided with more material. There is no suitable book within the subject, but attempts should be made to perhaps find 2 books that cover larger parts of the course content. Laboratory elements are difficult when the student group is large. Previous laboratory work cannot be carried out because of this. Alternative proposals for laboratories must be investigated.
