

SO6003 (Social Sustainability in Civil Society, VT 2024, Halmstad, V2605)

Number of possible respondents: 46

Answers: 28

Response rate: 60,87 %

Study pace: 100 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The free text answers highlight in particular some good lectures, new and interesting topics which has not been covered in previous course, study visit to an NGO and a guest lecture about collaboration.

Based on the course evaluation result - which are the weaknesses of the course?

There are, unfortunately, several problems. The major problem (for swedish students) that the course was in english, with english literature. The collaboration in the groups did not work well. Seminars (instead of workshops)

Comments about the collaboration with the course ambassadors

The collaboration with the course ambassador has worked, but not really solved the problem appearing in the course, probably because of the difficulties involved.

Conclusion and suggestions for course development or already made decisions

The conclusion is that there needs to be a plan for new relevant literature in english, easier for students, not so versatily in english, to read and understand.

Other comments

We teachers knew that the literature was in english. But teachers and students got to know less than a week before the course start that we were going to have one international student. This created quite a lot of stress, and uneasiness among students. Very positive is, nevertheless, the study visit to the NGOs, providing students with experiences related to how NGOs work in civil society. It was also positive that the international student told the rest of the class about her experiences from the civil society in her home country.
