

BF8010 (Advanced Course in District Heating Technology, HT 2023, Halmstad, H0801, X0701)

Number of possible respondents: 28

Answers: 14

Response rate: 50,00 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Course design (teaching methods, literature, course materials, pedagogy, engagement) and social study environment. Study visit, laboratory session, and other examination formats.

Based on the course evaluation result - which are the weaknesses of the course?

Lecture presentations include occasional outdated material, which are to be continuously updated.

Comments about the collaboration with the course ambassadors

No student ambassadors were recruited, but continuous dialogue regarding course design with participating students throughout the course.

Conclusion and suggestions for course development or already made decisions

No additional changes regarding course design planned for next year. It is likely that a new study visit object will have to be found (current contact in Helsingborg retires this year).

Other comments

With a course satisfaction index of 94% (at 50% response rate), I am happy to conclude that the course design, including the improvements from last year, now seems quite appropriate!
