

DI2012 (Computer Networks, HT 2023, Halmstad, H3222, X3109)

Number of possible respondents: 27

Answers: 16

Response rate: 59,26 %

Study pace: 50 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The practical parts of the course (laborations, case studies and skill exam) have been really appreciated, especially to use real lab equipment.

Based on the course evaluation result - which are the weaknesses of the course?

There is a lot of information on the lectures, and sometimes it seems difficult to understand how this theory will be implemented practically during the lab sessions.

Comments about the collaboration with the course ambassadors

No students were interested in becoming course ambassadors, but the teachers met the students during lab sessions every week and could get feedback directly.

Conclusion and suggestions for course development or already made decisions

The course evaluation results were overall good, and no major changes will be done. We are always trying to improve the courses, and are updating the lectures continuously.
