Studietakt: 50 %

Examinators kursanalys

Vilka styrkor har kursen?

The overall satisfaction index (Nöjdhetsindex) has increased from 51% last year to 67% this year, which shows a clear improvement in the students' opinions. This is apparent in all aspects of course design, examination, and social environment. Students have shown in their comments satisfaction with the lectures and exercise sessions even though there have been criticisms and suggestions for improvements. The most positive comments are about the practice sessions. This means that improvements in lecturing and especially exercise sessions from last year have been effective.

Vilka svagheter har kursen?

There are still comments that mention the lectures as boring and demand more exercise time. In one case, for example, the student suggests mixing each normal lecture with a practical session. Another criticism is that problem solving in practice sessions should be done in groups. However, this is not completely possible since some basics need to be learned by all individuals.

Kommentera samarbetet med kursambassadörerna

There was one course ambassador who volunteered. Feedback from students was also collected through the ambassador. The positive feedback and issues that were raised were like the comments in course evaluations. Namely there was great satisfaction with the exercise solving sessions and a demand for integrating more practice into lectures which will be considered for next year.

Slutsatser samt eventuella förslag till kursutveckling eller beslut som redan fattats

Comments from the students have been considered and it has been planned that next year lectures become more practical by adding more opportunity for students to solve examples during lectures. Also redesigning the lectures to include more useful and less theoretical content will be considered for the next iteration of the course. However, this could be done only to a certain extent since the course must cover a certain amount of theory.

Övriga kommentarer

The survey was answered by 11 students. The final exam was taken by 26 students.
