Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The course project and the learning capacity of it.

Based on the course evaluation result - which are the weaknesses of the course?

It is difficult to keep the uniform structure of the course with so many teachers. The fact that the teachers rotate too (due to personnel changes) does not help either.

Comments about the collaboration with the course ambassadors

The work with the course ambassadors was good, though there was only high activity at the beginning of the course (I attribute this to the students involved being occupied with the project and their thesis work a lot in the second half).

Conclusion and suggestions for course development or already made decisions

There were some comments about the form and suitability of the oral exam of the course, this is something that the responsible teacher (this year on parental leave) and the examiner (the stand-in teacher for this year) have to discuss before the next instance of the course.

Other comments

I would like to thank all the participating students for providing the feedback for the course.

Wojciech
