Conclusion and suggestions for course development or already made decisions

Some of the student comments are not fair. For instance, the teaching assistant (TA) has already announced office hours for additional support. Some of the students, I am afraid, did not visit the TA during these periods and, instead, preferred to ask for more help. Not fair. Giving one week for each assignment is fair enough, as this is an advanced course at the Master's level. Some students lack a programming background, which makes the assignments more challenging for them. However, this is not a programming course, thus, we cannot teach how to sharpen their coding skills. We have already dedicated one week to teaching them the basics of coding.
