

IK8028 (Design for Extended Realities, HT 2023, Ortsoberoende, 13204)

Number of possible respondents: 21

Answers: 7

Response rate: 33,33 %

Study pace: 12 %

Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

Methods, pace, and content are considered to be very good, as confirmed by individual chats I had with students. Same for the actual pedagogical structure (peer-review, feedback from staff, etc)

Based on the course evaluation result - which are the weaknesses of the course?

Difficult to keep the class (as a whole) engaged for the entirety of the course while maintaining a good balance with the students' work life. This is confirmed by a descending trend in assignments across the three exercises which provide the course credits

Comments about the collaboration with the course ambassadors

Not applicable

Conclusion and suggestions for course development or already made decisions

After two runs, we now have a better idea for how to handle specific aspects of the assignments that have proved hard to handle due to the huge variety in background on the side of students. This will be hopefully implemented in the Fall of 2024 run
