Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

The mix of learning activities with seminars, lectures, excursions offer student ample support to reach the learning goals of the course. Much of the learning is seminar-based and that structure is appreciated by the students. The course literature is comprehensive and up-to-date and is joyful reading. The excursion to a Swedish city where we study nature-based solutions in practice gives an additional perspective to the theories discussed at the seminars.

Based on the course evaluation result - which are the weaknesses of the course?

The time planning related to the seminars can be improved since some students felt a pressure to finish the readings in time for the seminar. The time allocated for the project presentations could be extended to offer more time for discussion.

Comments about the collaboration with the course ambassadors

The course leader and the teachers had a continuous dialogue with the students during the course and made adjustments on the teaching activities according to the students' suggestions. For example, the seminars were done a little bit differently based on a discussion on how the dialogue could be improved at the seminars.

Conclusion and suggestions for course development or already made decisions

In large, the course operates well and the course evaluation does not call for any major adjustments. Time allocated for seminars and project presentations will be looked over until next course batch.
