Examiner's course analysis

Based on the course evaluation result - which are the strengths of the course?

In general, you have appreciated the mix of lectures, seminars, and the opportunity to learn about different areas of musculoskeletal diseases.

Based on the course evaluation result - which are the weaknesses of the course?

Experiences of poor course structure, poor quality of discussions, and lack of information on the purpose of learning activities. Missing in-depth analysis of specific treatment measures.

Comments about the collaboration with the course ambassadors

We have tried to check on an ongoing basis and have listened to the feedback received.

Conclusion and suggestions for course development or already made decisions

We will try to provide a clearer structure of the course, including further information on the deadlines and the examinations. Also, more apparent information on the purpose of the different seminars will be developed.

Other comments

The course aims to cover musculoskeletal disorders, which is clearly stated in the syllabus when you apply for the course. During the course, we try to ensure that the most common ones are covered. There are more musculoskeletal diseases to delve into. But, the size of the course (7.5 credits) limits this. Available university lecturers and professors also impact the content to some extent.

The course evaluation shows an overall satisfaction index of 67%, based on a response rate of 70%.
